

I chose to do a journal entry for my primary source because I feel I can best explain my experiences as a high school student during this pandemic. Personally I feel like the pandemic was only rough in the beginning because I had just developed a new relationship that would change my life forever and then I could not see that person for about 3 months so it was basically Facetime calls every night. After my parents started letting me see people again it was just about the middle of summer and I would have to say it was the best summer of my life and I will never forget it. I made many new friends and I bonded with my family and that relationship I developed in the beginning grew a lot stronger. The pandemic made me think that my life would be forever changed and I thought that my life was going to be isolated for the rest of my life but now in June of 2021 life seems to be coming back to normal and is absolutely amazing. As Fall came and we were all going back to school they announced that we would only be going two days a week and Monday, Tuesday, Wednesday were going to be virtual learning days. I thought that my grades would be absolutely amazing but I was very wrong. It was a lot harder to keep my grades up because of all of the distractions that I had during virtual days and it was harder to understand the two days we had of school. I noticed that since we have gone back to school four days a week, starting May 3rd, my grades have gone way up. I still have that amazing relationship and I hope we last forever.
